Solution

Our Material

We only use the highest quality and most durable preformed thermoplastic, providing many advantages over traditional painted or hot applied systems. All our playground markings are precision waterjet cut, allowing us to create extremely intricate designs. What's more, these thermoplastic markings are highly versatile meaning they can be fitted to most surfaces including concrete and tarmac.

- ◆ High UV Resistance meaning the colours will stay bright for a long time
- ◆ Available in 18 eye-catching colours
- ◆ Non-toxic
- ◆ Environmentally friendly
- ◆ Contains no lead or chromates
- ◆ Safe anti-slip finish
- ◆ Flexible and durable
- ◆ Lasts 10 times longer than paint

Fun Games

Just like in the classroom, we understand that sometimes it's important for learning to be fun. By integrating fun into a child's educational journey, the development of softer skills alongside the improvement of more academic abilities makes for a well-rounded learning experience. Check out our range of fun thermoplastic playground games.

Targets

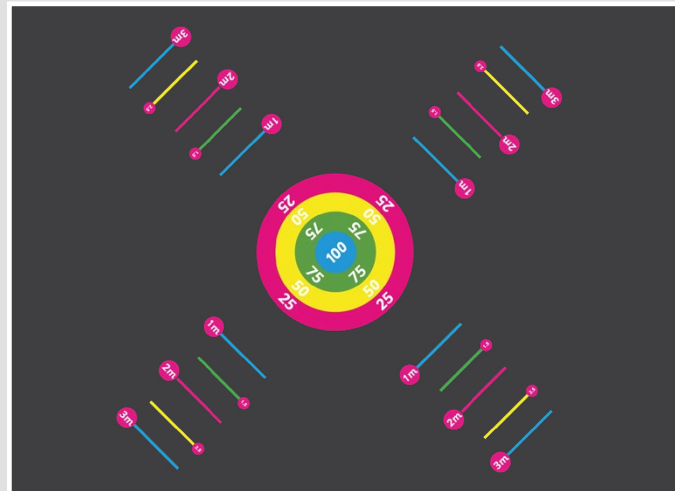

Hand-eye coordination is an important part of any child's development and isn't reserved purely for sport and competitive environments. Our target games are designed to improve these skills so that they can be applied in other areas. The bright and vibrant colours used in these targets increase children's enjoyment and engagement.

Sports Coating

Available in 12 different colours, our Sports Coating has an advanced formula perfect for coating sports courts. It provides an eco-friendly finish and has a high slip resistance, making it safe in all weathers. We also offer water and solvent based tarmac binders which supports a longer lasting finish.

Anti-Slip Playground Paint

Another great solution for covering large areas of tarmac is our durable Anti-Slip Playground Paint. This long-lasting paint has 7 bold colours to choose from and is ideal for making your sports courts more fun and appealing to your pupils.

Methacrylate Cold Plastic (MMA)

For smaller areas of tarmac, and to make your playground markings really stand out, use our Methacrylate Cold Plastic (MMA). Ultra-durable and slip-resistant, this solution is available in 22 colours and is great for covering up any tarmac scarring too.

Thermoplastic

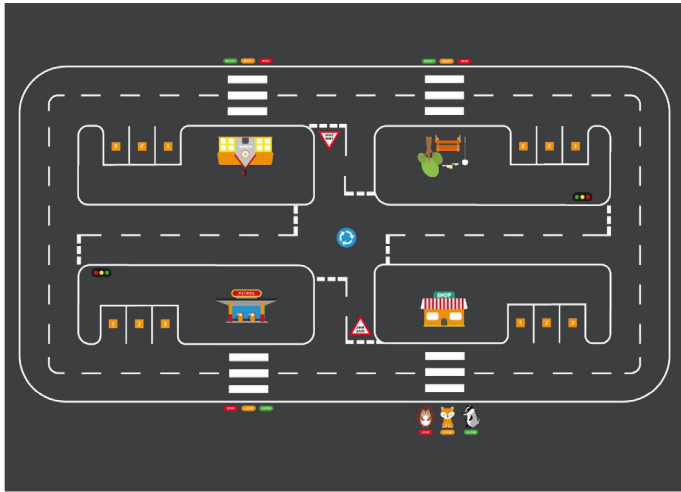

When budget allows, using our thermoplastic material for full colour courts is a fantastic alternative that delivers a real wow-factor! We can cut intricate designs to create impressive sports courts that will really motivate budding sport stars. Available in 26 colours.

	Sports Coating	Anti-Slip Playground Paint	Methacrylate Cold Plastic (MMA)	Thermoplastic

Mile a Day

We're passionate about improving outdoor areas to increase activity in children, helping to fight childhood obesity. Walking, running, or jogging a mile a day will take less than 20 minutes! Plus, it helps to improve fitness and make children more aware of their health. That's why our Mile a Day playground marking is perfect for any school wanting to encourage those first steps.

Removals

If you have old markings that you'd like removed, take advantage of our Playground Marking Removals service. There are different methods we can use, and our knowledgeable team will be able to advise you on which is most suitable to use on your playground.

Vapour blasting

Our most effective method for removing playground markings is vapour blasting. A specially formulated abrasive media is mixed with a small amount of water, pressurised in a pressure pot, and blasted through a nozzle mixed with compressed air.

This process ensures minimal airborne dust as each piece of media, approx. 1mm wide, is encapsulated by the water. Whilst this is not the fastest or cheapest method of removing markings, it does so with minimal damage to the surface, best preparing the ground for new markings.

Our state-of-the-art removals machine allows us to deliver a high-quality service. Being very mobile, it's easy to get into most areas. Plus, its vapour blasting nozzle is extremely precise at only 2-3cm wide, which means damage caused to the surrounding surface can be completely avoided.

Whilst you will be able to faintly see where the old markings were, this technique leaves a lot less scarring than alternative methods such as hydro blasting and sand jetting.

Our removals are often completed at a weekend in order to minimise disruption at the playground. What's more, as part of the clean-up operation, we will either use a road sweeper or jet wash to make sure the playground is left in a tidy condition, at no extra cost.

Tarmac Restorer

When your old tarmac is looking tired, but budget doesn't allow for resurfacing, we have the perfect solution to deliver the same new look. Our high-performance Tarmac Restorer can be applied to your playground, completely refreshing the appearance, reinstating the deep, black colour.

The restorer is coated onto the surface with roller brushes and once dry, our thermoplastic markings can be installed over the top. Together with our bright designs, our Tarmac Restorer recreates the feeling of a brand new playground. What's more, it provides long term protection against common spills and weed growth, meaning further tarmac repair needs are reduced.
